About Me

Computer Science Engineering Graduate with hands-on experience in python Full Stack Development, AI/ML, and web development. Skilled in Python, Django, React.js, and problem-solving with strong knowledge of software development, database management. Demonstrated leadership and coordination abilities through roles in IEEE ComSoc and college media initiatives, including successfully organizing inter-college technical events. A proactive team player with strong communication, event management, and collaboration skills, passionate about building innovative technology solutions and contributing to impactful projects.

Education

B.Tech in Computer Science Engineering 2022 – 2026
College of Engineering Poonjar, Kerala

Skills

- **Programming Languages:** Python, java , C/C++ ,
- **Frontend Development:** HTML, CSS, React.js
- **Backend Development:** Django, flask
- **Database Management:** MySQL, MongoDB
- **AI/ML Technologies:** TensorFlow, Scikit-Learn, NumPy, Pandas
- **Soft Skills:** Leadership, Team Collaboration, Communication, Time Management, Adaptability

Projects

Web-Based Smart Distribution Transformer Condition Monitoring and Reporting System

Main Project — Full stack Developer

- Developed a web-based interface for a smart distribution transformer condition monitoring and reporting system.
- Designed and implemented a real-time monitoring dashboard to visualize transformer simulation data and operational status.
- Contributed to integrating simulation outputs into the web platform for condition tracking and reporting.
- Improved accessibility and usability of transformer monitoring through an interactive web interface.

Bus Budget Management System

Mini Project — React, Django, MySQL, Google Maps API

- Developed a web-based bus management system for student pass approval, fee management, and route tracking.
- Implemented authentication, payment workflow, notification system, and Google Maps integration.
- Improved operational efficiency by digitizing manual bus pass and reporting processes.

Seminar

Cyber Attack Prediction: From Traditional Machine Learning to Generative Artificial Intelligence

- Presented a seminar on AI-driven cyber attack prediction using ML, DL, XAI, and Generative AI.

Experience

Infosys Springboard – AI/ML Internship Sep 2025 – Nov 2025

- Developed TensorFlow-based image preprocessing pipeline for oil spill detection using satellite imagery.
- Applied deep learning techniques including CNN/U-Net models for satellite image segmentation and analysis.
- Improved model performance and optimized preprocessing workflow.

IEEE ComSoc Kerala Chapter – Video Editor 2025 – 2026

- Organized webinars and workshops, improving student engagement.

IEEE ComSoc Student Branch Poonjar – Chair 2025 – 2026

- Led IEEE ComSoc Student Branch activities and coordinated technical programs.
- Successfully organized **Synergy'25**, a major inter-college technical event with active student participation.
- Managed event planning, team coordination, sponsorship communication, and overall execution, contributing to the event's success.

College of Engineering Poonjar Media Team – Co-Founder 2024 – 2026

- Created digital media content and strengthened college branding.
